| Provoke Professional Rat Attractant | PR8098               | PBT/vPvB substances $\geq 0.1\%$ | Gel for rat traps is a food-based gel |
|                                     |                      |                                  |                                       |

Under the terms of the Control of Substances Hazardous to Health Regulations 2002 an assessment will be made to determine that this particular treatment is the most appropriate for the pest control work concerned. Details of the location and quantity of the pesticide that has been applied are included within the pest prevention report book.

Only pesticides approved under the terms of the Control of Pesticides Regulations 1986 will be used and these are applied according to the label recommendations.

#### **COSHH and Environmental Risk Assessment**

| <b>No.</b> | <b>Hazard Detail</b>                | <b>Controlled Risk</b> | <b>Protective / Preventative Measures</b>                                                        |
|------------|-------------------------------------|------------------------|--------------------------------------------------------------------------------------------------|
| 1          | Non-pest control personnel exposure | Low                    | Use small quantities and place within secure bait stations. Remove excess product and packaging. |
| 2          | Operator exposure                   | Low                    | Wear gloves during application. Wash hands after use.                                            |
| 3          | Non-target animals' exposure        | Low                    | Apply within tamper-resistant bait stations to limit access.                                     |
| 4          | Spillage                            | Low                    | Clean immediately using absorbent material and dispose appropriately.                            |
| 5          | Disposal                            | Low                    | Dispose of unused product and contaminated materials in accordance with local regulations.       |
| 6          | Fire                                | Low                    | Product is not highly flammable. In fire, avoid inhaling fumes.                                  |
| 7          | Theft or misuse                     | Low                    | Store securely in original container when not in use.                                            |
| 8          | Ingestion                           | Low                    | If swallowed, rinse mouth and seek medical advice if symptoms occur.                             |
| 9          | Inhalation                          | Low                    | Low risk. Use in well-ventilated areas.                                                          |
| 10         | Skin contact                        | Low                    | Wash with soap and water if contact occurs.                                                      |
| 11         | Eye contact                         | Low                    | Rinse cautiously with water for several minutes if contact occurs.                               |
| 12         | Environmental risk                  | Low                    | Prevent release into drains and watercourses.                                                    |
